PROFILE

Motivated and creative graduate with a first-class degree in Computer Games Technology from Birmingham City University, passionate about technology, web development and games. Experienced with both front-end and back-end development, with proficiency in JavaScript, HTML, and CSS. Skilled in building modern user interfaces using tools such as ReactJS, Bootstrap and Tailwind, with a solid foundation in server-side development using NodeJS and ExpressJS. A detail-oriented and collaborative team player with strong problem-solving, and bug-fixing skills, with excellent verbal and written communication abilities. Focused on delivering engaging and optimised user experiences. Currently seeking an opportunity to contribute and grow as a professional developer.
